

# Agatech System Roadmap

## 2023 - Q3

- Agata Token deployment
- Creation of Agatech Whitepaper
- Agatech community building
- Agatech system designing.
- Preparing for ICO

## 2023 - Q4

- Initial Coin Offering
- Listing on decentralized exchanges
- Listing on CoinMarketFacts
- Listing on CoinGecko
- 500 Agata holders
- \$AGATA price displayed in wallets.
- Development of AGATA token smart contracts for other chains, starting with AGATA ERC20, Polygon, Arbitrum.
- Revamping the Agatech website to better reflect current developments and future goals and overall ease of access and understanding to the Agatech ecosystem
- Start development of Anyholder wallet and Agaswap.

- Start design and developement of CoinMarketFacts
- Begin the re-creation of Agademy and the design phase for Agachain.
- Re-creation of Lambro token with fixed issues and structured according to Agatech.
- Creation of new Lambro website, assemble development team, start partnership outreach and develop initial marketing strategies for Lambro 2.0

## **2024 - Q1**

- Re-lock Agata tokens with a timeframe based on current developement progress
- Set up team token vesting when tokens unlock
- Launch AGATA ERC20 token and initiate cross-chain integration.
- Agata token smart contracts for TRC20 and Avalanche
- Continue website enhancements with updated information and user interface improvements.
- Deploy functional core version of Anyholder wallet and
- Improvements in developement of Agaswap and integration with Anyholder.

- Advancement of Agademy with new curriculum and platform features.
- Further design and development of Agachain.
- 1,000 AGATA holders
- Begin developing key features like automated audits, token sale management for SmartLauncher.
- Focus on technological advancements, including researching quantum-resistant algorithms and exploring AI integration for Agasky.
- First version release of Lambro 2.0, conduct internal testing, produce in-house content like games, user generated content like memes.

## **2024 - Q2**

- Implement marketing strategies to increase AGATA token holders.
- Agata token smart contracts for Optimism and Zksync
- Beta versions of Anyholder wallet and Agaswap available for community feedback.
- Release the first version of Coinmarketfacts.
- Continue Agademy's platform development and content creation.
- Initiate comprehensive marketing campaigns for Lambro, engage with the community, and monitor KPIs.

- Reward Lambro 1.0 holders
- SmartLauncher: Enhance security measures, increase transparency in token launch processes, and foster community engagement.
- Aigata: Begin implementing user-centric solutions, integrating AI for personalized experiences and enhancing blockchain security.

## **2024 - Q3**

- Official launch of Anyholder wallet and Agaswap.
- Introduce new features and courses in Agademy.
- Start Agachain's initial testing phase.
- Expand AGATA token's market presence and partnerships.
- Lambro 2.0: Official public launch with refined features, set up a real-time KPI dashboard, introduce user engagement activities, and establish customer support.
- SmartLauncher: Implement community-centric governance features, and crisis management & contingency plans.
- Aigata: Expand the role within the Agatech ecosystem and synergize with other platforms for technical and strategic collaboration.

## 2024 - Q4

- Evaluate and iterate on Anyholder wallet and Agaswap based on user feedback.
- Roll out additional Agademy features and partnerships with educational institutions.
- Deploy Agata token on planned networks
- Continued development and testing of Agachain.
- Enhance AGATA token's ecosystem with new functionalities and integrations.
- 5,000 AGATA Holders
- Lambro 2.0: Roll out feature updates, explore additional revenue streams, conduct market analysis, expand partnerships, and perform a year-end review.
- SmartLauncher: Focus on innovation, staying ahead of emerging technologies.
- Agasky: Implement user feedback loops and customizable user experience features, engage in strategic partnerships for industry leadership.

## 2025 - Q1

- Prepare for Agachain testnet launch.
- Update Anyholder wallet and Agaswap with advanced features.
- Expand Agademy's reach with more courses and language options.
- Develop additional AGATA token contracts for more chains.
- SmartLauncher: Reevaluate and refine the platform based on the year's developments.
- Aigata: Continue enhancing security and transparency, and tightly integrate with CoinMarketFacts (CMF) for seamless workflow.

## 2025 - Q2

- Analyze Agachain testnet results and plan for mainnet launch.
- Introduce governance features in Agaswap.
- Roll out major Agademy updates based on user feedback.
- Lambro 2.0: Focus on platform scalability and begin content diversification based on user demand.

- SmartLauncher: Begin global expansion and integration with physical retail outlets.
- Aigata: Focus on scalability, content diversification, and begin global expansion efforts.

## **2025 - Q3**

- Agachain testnet launch and community testing.
- Enhance cross-chain functionalities for AGATA token.
- Continue to grow the Agatech ecosystem with strategic partnerships and community engagement.

## **2025 - Q4**

- Prepare for Agachain mainnet launch.
- Evaluate year's progress, plan for further expansions and developments across all platforms.
- Lambro 2.0: Continue scaling efforts, expand to new markets or languages, introduce community features, and update long-term strategy based on market evolution.

- SmartLauncher: Launch intelligent assistants and enhance DeFi capabilities and user experience.
- Aigata: Continue global expansion and industry penetration, focus on partnerships and collaborations for growth.
- Agasky: Focus on future horizons, adapt to technological advancements like quantum-resistant algorithms and AI integrations.

## **2026 - Q1-Q4 (Continuous)**

- Ongoing development and improvement of all Agatech platforms based on user feedback and market trends.
- Agachain mainnet launch.
- Expand AGATA token utilities and market presence.
- Continuous innovation and integration of new technologies in Agachain, Agaswap, Anyholder wallet, and Agademy.
- Lambro 2.0: Further scaling, diversification, and community engagement, along with continuous market and user feedback analysis to guide future developments.
- SmartLauncher: Achieve scalability and global outreach, focus on continuous improvement and community engagement.
- Aigata: Focus on emerging technologies & integration, expanding the toolset to include financial, analytical, and governance tools.

- Agasky: Continue evolving with technological advancements and user needs, maintain focus on innovation, user-centricity, and industry leadership.
